

Logic Inspiration Of Numbers

WenChin Sui © 2019.2.14

What I want to say about my test

- This is my first numerical test and it is not perfect, just as our first love is not mature.
- In some cases, we give something a number because it is meaningful. But in other cases, we just want to differentiate it from other things.
- Discussion is strictly prohibited with anybody at any time. Take as much time as you need and enjoy the process.

How to submit my test

- Third submission is allowed for the same testee, but only the first two submissions are considered valid.
- A small fee of 100CNY/16USD/14EUR is charged every submission. I accept payment through Alipay/Paypal to my account njusuwj@163.com .
- Put your solutions in a word/PDF document, and send it to my email address: njusuwj@163.com . Please also send your prior scores on other high range IQ tests. Thank you very much.
- Normally you will receive my reply with your raw score in it in two weeks.
